

Vacuum KIT

innova.no

Part number: 6019003

Vacuum KIT consists of a vacuum pump, gauge, and various fittings.

This vacuum kit includes all essential components needed for vacuum testing multiplexers after repair.

Innova recommends vacuum testing after the canister has been opened and closed to test integrity of the O-rings and connectors on the lid.

Key features

- Gauge reading from +1 to -1 bar
- Vacuum pump suitable for continuous use
- Kit is packed in a rugged Nanuk case

PACKAGING

- Pump unit weight: 8,2kg
- Nanuk 933, 503x408x255mm
- Total weight: 12,5kg

INTERFACE

- Swagelock to vent plug
- Seavent adaptor

ELECTRICAL
